TOWN WARRANT

The State of New Hampshire

To the Inhabitants of the Town of Warren in the County of Grafton, in said state, qualified to vote in Town Affairs:

You are hereby notified to meet at the Town Hall in said Warren on Tuesday, the eighth day of March next, at nine of the clock in the forenoon, to act upon the following subjects:

1 To choose all necessary Town Officers for the year ensuing.

2 To raise such sums of money as may be necessary to defray town charges for the ensuing year and make appropriation of the same.

3 To bring in your votes for the election of Delegates at Large, Alternate Delegates at Large, Delegates and Alternate Delegates to the National Conventions of the various political parties to be held to nominate party candidates for President and Vice President of the United States.

4 To hear the reports of the Selectmen and all other town officers and to pass any vote relating thereto.

5 To raise and appropriate money for support of town poor.

6 To raise and appropriate money for the maintenance of State Trunk Line roads.

7 To raise and appropriate money for the maintenance of State Aid roads.

8 To raise and appropriate money for laying out, building, and repairing highways and bridges.

9 To raise and appropriate money for Town Library.

10 To raise and appropriate money for Memorial Day.

11 To raise and appropriate money for cemeteries in said town and pass any vote relating thereto.

12 To raise and appropriate the sum of \$300.00 for White Pine Blister Rust control.

13 To raise and appropriate money for other town charges.

14 To authorize the selectmen to distribute the blanks for inventories at the time they examine and appraise taxable property.

15 To see if the town will vote to allow discount on taxes paid and decide the dates and percentage for same.

16 To authorize the selectmen to hire money in anticipation of taxes.

17 To see if the town will vote to authorize the selectmen to dispose of the town farm buildings.

18 To see if the town will grant the use of Town Hall to Warren Grange for the year 1932 at the rate of one dollar per night.

19 To hear the report of Water Committee and pass any vote relating thereto.

20 To see if the town will raise and appropriate money to maintain street lights at Glencliff in the event of some company extending their line to that place.

21 To transact any other business that may legally come before said meeting.

Given under our hands and seal, this eighteenth day of February, in the year of our Lord nineteen hundred and thirty-two.

WILLIAM B. NICOL,
CHARLES F. LITTLE,
EVERETT A. MORRISON,
Selectmen of Warren.

A true copy of Warrant—Attest:

WILLIAM B. NICOL,
CHARLES F. LITTLE,
EVERETT A. MORRISON,
Selectmen of Warren.

LIBRARIAN'S REPORT

Number of borrowers from the library — 156 adults and 73 children. 6971 books and 401 magazines have been in circulation during the year. The books have been re-catalogued and no books were let out for four weeks.

Two hundred books that have been taken from the shelves to make room for new books, have been sent to Glencliff. Some provision should be made for more shelf room at the library.

The librarian received in November 11 books for adult readers and 13 children's books from the Public Library Commission at Concord. 14 books of fiction were placed in circulation Saturday, January 30, 1932. Miss Hester Prescott presented the past year the American Magazine, Woman's Home Companion and Ladies Home Journal. Mrs. Rowell, Cosmopolitan. Popular Science, World's Work, National Geographic, Country Gentleman, Saturday Evening Post, Junior Home, Field and Stream and Fishing and Hunting magazines are to be found on the tables.

AGNES H. ROWELL, Librarian.

REPORT ON WATER SUPPLY

June 6, 1931

Water Supply Committee,
Town of Warren, New Hampshire.
Gentlemen:

In accordance with your request I have made a preliminary investigation of water supply for the Town of Warren. I have visited the various sources of water and have had some surveys and measurements made. Analyses of the water from various sources have been made by the State Board of Health.

Consumption

There are 104 houses in the village which would be supplied with water. Assuming that the population is 400 I should expect a consumption of approximately 50 gals. per capita per day or a total of 20,000 gals. per day, equivalent to 15 gals. per minute. The supply should be capable of supplying at least twice this amount.

In addition to supplying this domestic use it is necessary to supply many times this amount for short periods for fire protection and it is this use that fixes the size of the reservoir and distribution mains in the village.

Two main types of supply have been considered, a gravity supply and a pumped supply. The reservoir or standpipe and the distribution system in the village would be the same in either case.

Reservoir and Distribution System

A reservoir holding at least 100,000 gals. is planned on the hill east of the village. This allows for about five days of ordinary domestic supply and 3 to 5 hours of fire supply use. The reservoir will be a covered circular wood stave tank about 20 ft. high set on a concrete foundation.

The distribution system will consist of a 6" cast iron pipe leading from the tank to and through the

streets of the village. I have figured on using a 5 ft. earth cover over the pipe. Hydrants will be located every 600 feet so that any house can be reached by 300 feet of hose. The cost of services to the lot line has been included in the distribution system estimate but no meters. The estimated construction cost of this work is \$26,490.

Gravity Supply

Baker River was considered as a source of supply. There is an excellent site for an intake on the river at Jewell Bridge 2.8 miles north of the village with ample elevation to give sufficient pressure. This point, however, is below the outlet of Merrill Brook on which the Moosilauke Inn has a swimming pool and as long as this is maintained the Jewell Bridge site is not suitable. About a mile and a quarter further up, however, there is a possible site on the East branch which takes in the water sheds of the East branch, Kineo Brook and Libby Brook, giving a total drainage area of about six and one half square miles. This point is apparently the best chance for a gravity supply. It will give ample water of a good quality and at a good elevation.

The gravity supply would consist of a small concrete intake dam at the source and small pipe, probably 3 inches, capable of carrying a liberal provision for domestic use for all times (say 30 gals. per minute), leading to the reservoir or standpipe above the village. The water would be allowed to flow continuously through the pipe from the intake into the tank and overflow so that there would always be a flow of water through the pipe.

The tank serves several purposes. It allows the use of a small pipe from the intake providing a source for the large flow of water necessary for a few hours for fire protection, the saving in size of the pipe being more than the cost of the tank; it gives a large supply of water near the town thereby making a safer installa-

tion for fire protection; it serves as a temporary supply if repairs are necessary on the long pipe or the intake, or if the intake gets stopped up; it maintains a more satisfactory service by giving a constant pressure which would not obtain if the village supply were directly connected to a four mile pipe line.

The estimated construction cost of this supply without any allowance for land or rights of way is as follows:

Intake and pipe line to East Branch	\$22,770 00
Reservoir and Distribution System	26,490 00
	<hr/>
	\$49,260 00

Meder Pond was also examined as a source of supply. It is about $4\frac{1}{2}$ miles northeast of the village. It would cost as much as the East Branch supply and as the quality of water as regards color and odor is not as good it was not further considered.

Pumped Supply

As an alternative to gravity supply a pumped supply has been considered, using ground water from the springs in the neighborhood of the present Cold Spring. This water is of good quality and probably of sufficient quantity. Without any attempt to collect any water from the ground the present water flowing from the ground to the surface and into Clement Pond amounts to about 24 gals. per minute. This may be expected to decrease as the dry season approaches but the evidence is that water is always available here though this cannot be definitely stated without a measurement over a longer period than has yet been made.

The supply in this case would consist of a collecting well or wells from which the water would be pumped to a tank on the hill to the east by an automatic electric pump controlled by a pressure switch. A duplicate pump driven by gasoline would be provided in case of failure of the electric power or pump. The tank would serve the same purposes as in the case of the gravity

supply, that is, supply a source of supply for immediate fire use and would save having pumps of sufficient capacity to pump water for fire protection requirements. The power for pumping, assuming 20,000 gals. per day would amount to about 12,500 Kw. hrs. per year costing at the .04 rate quoted by the White Mountain Power Co. \$500. per year. Should this amount of use be exceeded indicating excessive waste or leakage, the consumption could probably be held down to this by installing meters. I should not think this ought to be necessary and should not recommend it until operation without meters had been tried.

The construction cost of the pumped supply without any allowance for land or rights of way is estimated as follows:

Intake and Pumping Plant	\$2,227 00
Reservoir and Distribution	26,490 00
	<hr/>
	\$28,617 00

Before this source is adopted the measurement of water there should be continued until the middle of the summer. A simple pumping test from the present spring would also be advisable.

If the ground around Cold Spring should not prove to give a sufficient supply I think a pumped supply could be obtained from Berry Brook.

Either the gravity supply or the pumped supply as laid out would be equally satisfactory and reliable. The pumped supply is cheaper, the interest and retirement charges on the \$20,000 additional first cost of the gravity supply being considerably more than the yearly cost of pumping, and the yearly cost for operation and maintenance of the pump would be only slightly greater than the maintenance and inspection of the gravity supply.

In my opinion the advantages of the gravity supply are not sufficient to justify its higher cost at the present time and I recommend the adoption of the

pumping plan pending the verification of the adequacy of the proposed and other possible sources.

Yours very truly,

HOWARD M. TURNER.

REPORT OF SUPERINTENDENT OF SCHOOLS

To the School Board and Citizens of the Warren School district—I hereby submit my second annual report as Superintendent of the Warren Public Schools.

Instruction

One change occurred in the teaching staff in the resignation of Helen K. Evans after several years of successful work. Elvira Boston, a Normal graduate of three years' experience, is in charge of the intermediate room.

The modern educational philosophy held almost universally by the leading experts and educators of the country is that "The child can learn only by his own activity." This principle of self-activity is generally accepted throughout the public schools of the country. This theory is being discussed with teachers in group meetings and is the educational philosophy of the supervision of the district. Children should be happily engaged in carefully selected learning exercises toward definite objectives, and I believe that this is the case in general throughout your schools.

No child can be developed to his maximum ability when handicapped by physical discomfiture. The September health cards show approximately 26 appearances of diseased tonsils, 5 of adenoids, and 42 decayed teeth in the village school. As there are usually less than 100 in the building this is a large percentage. While it is probable that some of these do not need medical treatment certainly all need professional advice. Some of the physical defects extend back through a number of years. Such a condition invariably holds back the progress of the individuals and classes. It is a pertinent question as to just how far physically and mentally deficient children should wisely be forced beyond an average school day to do the work of nor-

mal children. The former can be remedied, the latter cannot. It is quite common for fraternal lodges and community clubs to operate a dental clinic which can be done at a nominal cost, and I submit this as a real worth-while community project.

The attendance improved last year and is much better so far this year. This is undoubtedly due in some measure to the appointment of a resident truant officer.

During the summer the village school was painted inside and new steps made in front. The building is in excellent condition. The district is following very closely the amounts allowed for state aid and operating at \$15.85 per pupil less than the average cost of the state.

The accumulative records of each pupil are now kept in a file and all data is readily available for conferences with parents and teachers. The practice of giving parents an opportunity to consult with superintendent and teachers is continued this year and it is hoped that many will avail themselves of this opportunity.

Respectfully submitted,
ALLAN M. McCURDY, Superintendent.

WARREN SCHOOL STATISTICS 1930-1931

Grade	Boys	Girls	Total	Grade	Boys	Girls	Total
I	8	14	22	V	13	5	18
II	7	9	16	VI	4	6	10
III	9	8	17	VII	6	7	13
IV	7	11	18	VIII	5	6	11
Total					59	66	125

Ten of above were from Benton.

Grammar — teacher, Bernice Boswell; per cent of attendance, 96.84; enrollment, 29; number of visits by Superintendent, 27; number of visits by nurse, 11; number of visits by Board, none.

Intermediate — teacher, Helen K. Evans, per cent of attendance, 96.49; enrollment, 37; number of visits by Superintendent, 27; number of visits by nurse, 10; number of visits by Board, none.

Primary — teacher, Natalie Smith; per cent of attendance, 93.02; enrollment, 37; number of visits by Superintendent, 29; number of visits by nurse, 11; number of visits by Board, none.

Glencliff — teacher, Wildie Stillings; per cent of attendance, 91.48; enrollment, 28; number of visits by Superintendent, 24; number of visits by nurse, 9; number of visits by Board, 2.

The total per cent of attendance was 94.51; enrollment, 131; the Superintendent made 107 visits and school nurse made 41; the School Board, two visits.

Less 6 in 2 schools, making a total enrollment of 125.

Ten of the above pupils were from Benton.
